Objective

Seeking a full-time position in web development to quickly adapt and contribute effectively to a dynamic company. Committed to continuous learning and becoming a Fullstack Web Developer within the next two years.

Work Experience

ITD GROUP: Fresher Front End   08/2022 – 07/2023

- Currently engaged in building and developing websites using Angular, with a particular focus on the following projects:

• Ioki: Managing "Objectives and Key Results" for efficient goal tracking.

• Iwater: Developing route management and water bill payment history features.

• Isecurity: Synthesizing security features for enhanced protection.

- Responsible for maintaining, developing new features, and managing source code versions of the company's previous projects built with AngularJS.

- Actively participate in project development meetings, contributing innovative solutions, and addressing potential risks.

- Proficiently convert design interfaces from Figma into fully functional projects.

- Read and comprehend Business Analysts' documents to align with project requirements.

- Provide support and guidance to students during their internship on various projects.

STECH VIET NAM: Intern Front End   05/2022 – 07/2022

- Contributed to building features and user interfaces for a web application called "Social Network for Blockchain" using Next.js

Personal Project

Portfolio: portfolio-chutoan.vercel.app

Showcases my projects and skills, demonstrating expertise in web development and design. Explore my work to see the projects, I have completed and the range of skills I possess in the field of web development.
